23 Innovation Events

106 Guided Tours
1400+ Participants

TIE Technology to the Future: The Largest Cross-domain Show in Taiwan

A showcase of Taiwan's innovations and prowess in various technical fields, facilitating a plethora of contract signing and tech collaboration as well as significantly promoting cross-domain tech exchange and industrial development.

Innovation Pilot Driving Innovation Forward

Representatives from businesses and research institutions gather together to showcase cutting-edge technology applications and industrial achievements. It aims to promote collaboration among industries and advanced technologies, driving tech innovation and industrial upgrade.

Emerging 5G Network Security Landscape Forum

Experts at home and abroad delve into the latest technologies, practical applications, and success stories to help domestic enterprises build secure, trustworthy, and resilient 5G security services.

Future Tech Global Tech and Industry Tie with Taiwan

Converge cutting-edge research achievements from all over the world; enhance public awareness of tech trends and their understanding of Taiwan's pivotal role in international scientific research via interactive science popularization experiences.

Future Tech Award

Attract top domestic research teams with competition, foster international collaboration, spark innovation possibilities, promote industry-academia tech exchange, and build the bridge for collaboration between academia, research and industry.

Sustainability SMART • RESILIENT • SUSTAINABLE • HEALTHY

Build a safe and prosperous life for all with smart connectivity, resilient food security, industry, and resource sustainability. Learn how to realize the blueprint of sustainable development, embark on the path to sustainability, and construct a green, zero-emission future together.

2024 Taiwan Sustainable Agriculture Forum: Regenerative agriculture focusing on soil and biodiversity

Experts in regenerative agriculture, soil, and ESG probe into the knowledge and international trends of regenerative agriculture from multiple perspectives, including regenerative farming practices, soil carbon sink, biodiversity, and ESG, to achieve the goal of net-zero transition in agriculture.

TIE with the World: From Enterprises & Industries to the World

From Research to Industry: The Path to Quantum Technology Implementation

Nobel Laureate in Physics, Alain Aspect, shares the path to quantum technology implementation and discusses the industrial landscape of Taiwan with various experts in the field of quantum science.

GenAI Stars: Industrial Applications Showcase

Cutting-edge generative AI applications spanning 19 industries are presented to demonstrate the diverse potential of AI technology.

2024 Global Technology Matchmaking Event I Collaborate to Innovate

The platform for world-class technology exchange and business matching brings together professionals from Japan, South Korea, Thailand, Indonesia, Singapore, Laos, etc. for in-depth technical exchanges and business meetings.
